Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 17-21, drawn to a semiconductor structure classified in class 257 subclass 197+.
- II. Claims 1-16, drawn to method for fabricating a heterojunction bipolar transistor, classified in class 438, subclass 312.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case unpatentability of the Group I invention does not necessarily imply unpatentability of the Group II invention, since the device of the Group I invention could be made by processes materially different than that of the Group II invention, for example the extrinsic base regions could be formed by diffusion rather than ion implantation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2813

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

During a telephone conversation with Mr. Wininger on 12/13/04 a provisional election was made without traverse to prosecute the invention of Group II, claim 1-16. Affirmation of this election must be made by applicant in replying to this Office action. Claims 17-21 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Art Unit: 2813

This application is in condition for allowance except for the presence of claims 17-21 to an invention non-elected without traverse. Accordingly, claims 17-21 have been cancelled.

The following is an examiner's statement of reasons for allowance: None of the references of record teaches or suggests the claimed method for forming a HBT including the steps of etching the emitter layer to form an emitter and expose the oxide layer by using the emitter pattern as an etching mask; and performing a second ion implantation as recited in claim 1, or forming a second emitter layer over the first emitter layer and the third dielectric, and etching the second emitter layer, the third dielectric layer, the second oxide layer and the first oxide layer to form an emitter and expose the second extrinsic base region as recited in claim 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan H. Nguyen whose telephone number is 571-272-1694. The examiner can normally be reached on 9AM-5:30PM.
